Cleaner. Faster.

ACCUTRAC 360-i

AUTOMATIC CAR WASH EQUIPMENT

Get tunnel numbers with a Petit in-bay automatic car wash system set-up.

Double Accutracs in-bays achieve over 60k cars per year while triple in-bays wash over a 100k cars per year. Let us help you make your car wash unmanned, touch-less, and claim-free so your car wash becomes stress-free.

Petit specializes in engineering excellence and we're proud of the wash numbers our in-bays achieve. When was the last time you assessed the effectiveness of your car wash equipment? With Petit's cutting-edge engineering and commitment to the highest quality behind it, the Accutracs 360-i will clean faster, last longer, and will require less maintenance over time.

The Accutracs 360-i cleans faster than other in-bay automatic car washes and our IBAs are able to get impressive tunnel numbers: up to 29 cars per hour. Our Dual Spray Arms wash, wax, and rinse vehicles in under three minutes per car. Faster wash times mean more customers per hour, and our car wash systems help you succeed with greater throughput. We want our car washes to perform, and our patented spray arms deliver. Plus, the dual arms eliminate the need for rotary swivels, making them ideal for use with reclaim water systems.

To extend product lifespan, we use stainless steel to withstand harsh car wash conditions.

Plus, we build our washes with sealed hypoid gearboxes, long-life polymer inserts, and with heated motors and electric boxes to prevent corrosion and condensation. We've eliminated pneumatic tires, belts, and pulleys in our car washes to reduce the amount of maintenance required to help you become profitable sooner.

We know first-year costs can make or break a car wash, so we mindfully design our washes with the best components and engineering available to minimize car wash maintenance and maximize car wash success. As a testament to our quality, our customers' average 1st-year maintenance costs are between \$200-\$500.

With a faster wash, car wash owners gain higher rates of Return On Investment (ROI) and car wash owners stop risking sales loss with long lines. Plus, you'll have happier customers because they won't have to sacrifice their time for superior cleaning results. With Petit you get a full clean, a fast wash, and easy maintenance. What's not to love? ★

29 CARS / HOUR

The Accutracs 360-i washes up to 29 cars per hour.

8 FT CLEARANCE

More room means more customers! Our standard 8-foot-high vehicle clearance increases your customer base.

2-3 MIN. WASHES

With double spray arms and our precisely designed oscillating spray heads, our car washes are built for speed and packed with quadruple the cleaning power.

Upgrade bonuses

9 Reasons to Upgrade ACCUTRAC 360-i

OUT WITH THE OLD, IN WITH THE CLEAN

When was the last time you assessed the effectiveness of your wash equipment? Upgrading to a high-performance Accutrac 360-i system will streamline your operations, cut out the headaches, and maximize your profitability.

Shorter Wait Times

Slash wait times with 2-3 min. washes. The Accutrac 360-i is fast, reliable, will increase volume, and it will exceed customer cleaning expectations.

Curb Appeal

Add curb appeal to your car wash with an Accutrac. New equipment has an immediate positive visual impact on your operation. Plus, LED lighting options available for a show.

Reliable by Design

We build our car washes to minimize maintenance and extend product lifespan. Our obsession for quality is our reputation and is why we can offer a 2-year limited warranty.

Real-Time Monitoring

Whether you're one mile or one hundred miles from the facility, Petit offers multiple options to remotely manage your car wash, chemicals, utilities, and functions.

Double Your Volume

Upgrading to high-performance equipment can streamline your car wash, cut out headaches, increase volume, and maximize profits by increasing vehicles served by 50%.

Help with My Yelp

Finally, a car wash that will help you avoid negative reviews! 94% of consumers say online reviews convinced them to avoid a business. With reliable equipment, your customers will get a great wash and you get great reviews.

ACCUTRAC 360-I
IN-BAY AUTOMATIC
CAR WASH SYSTEM

the Solution.

SAVE ON CHEMICALS, WATER & UTILITIES

Save on Chemicals

Petit makes accounting easy. We offer options that calculates and report the amount of chemical used per vehicle to help you tune into cleaning perfection.

Save on Water

The Accutrac 360-i uses 43 gall. of water per car while other washes use 70-80 gall. per car. That's half the volume of water that other systems use. That's a significant H2O savings!

Save on Utilities

Reduce your electricity consumption with Petit's VFD motor control. Plus, newer systems offer greater efficiencies with washing and electricity costs.

ACCUTRAC 360-i
UNITED AUTO WASH
STOW, OHIO

The Benefits.

200-400% MORE CLEANING

Our obsession to
Quality is our reputation.
**YOUR INCREASED
VOLUME IS THE RESULT OF
OUR OBSESSION.**

Superior cleaning

Get A Better, Faster Clean

Are you looking for tunnel results with the benefits of an in-bay automatic? The Accutrac 360-i may be the perfect wash for you. Our dual spray arms provide unprecedented throughput never before capable in an in-bay. Our reliable, oscillating spray heads are packed with quadruple the cleaning power. Accutrac speeds up your in-bay so you wax and rinse vehicles at a rate of 29/cars an hour; which is faster than most options on the market. Get superior cleaning power for your customers and leave their vehicles in pristine condition post wash.

Double Cleaning with Double Spray Coverage

If you've heard of Petit's before, it's because you've heard of our reliable, oscillation nozzles with 200-400% more impact. We weren't happy with the nozzles on the market, so we designed our own to tackle the biggest car wash challenges. Our spray nozzles are twice the size, deliver twice the spray power, and work reliably with reclaim water. Our spray pattern is narrower for a tightly focused point-of-cleaning contact. Each nozzle oscillates back and forth at high speeds so every spot on your car is cleaned at least twice.

Save & Conserve with Efficient Equipment

Does our Double Spray Feature sound like it requires more water? That's not the case. Data shows that our systems use 43 gallons per wash compared to 70-80 gallons per wash in other in-bay systems. Our eco-friendly water savings is in the technology: the Accutrac 360-i reduces per wash water by monitoring for vehicle height and activating nozzles only when they're needed. This exclusive feature is unique to Petit car wash systems. We take efficiency even further with the improved chemical applications of our Super-Clean Mode. The 360-i's Super-Clean Mode is designed for caked-on grime, bugs, and stubborn spots. Super-Clean provides quadruple spray coverage to obliterate hard-to-remove debris.

Built For Taller Vehicles

New trucks are taller. Our car washes can wash vehicles up to 8 feet high - that is 6 to 12 inches higher than the standard wash height of most in-bay and tunnel car wash systems. Not only can the Accutrac 360-i fit taller vehicles in the car wash, but we can clean them exceptionally well. Our oscillating spray nozzles deliver a quality wash for taller vehicles and are uniquely designed to handle vehicles with ladders, luggage racks, and other accessories. Our ability to target unique vehicles equals more potential sales for your customers. ✦

IN-BAY CAR WASH

6 SYSTEM
BENEFITS

1. Wash up to 29 cars per hour.
2. Wash taller vehicles with our 8-foot wash clearance.
3. Double spray, double oscillation speed = 400% more cleaning power
4. Reduce your electricity consumption with Petit's VFD motor control.
5. Reduce your water consumption with our nozzles that activate based on vehicle height.
6. With our 2-year limited warranty and a wash without rotary swivels, pneumatic tires, belts or pulleys, the 360-i benefits add up quickly.

Performance.

ACCUTRAC 360-i

FULLY LOADED FOR CLEANING

STAINLESS STEEL RAILS

We are obsessed with quality and our corrosion-resistant, stainless steel construction exemplifies our dedication to quality materials. Petit car washes have stainless steel rails and are built to last.

STAINLESS STEEL COMPONENTS

Stainless steel is the most durable material to use in car wash construction because it provides natural corrosion resistance in wet, chemical-heavy environments. We take our car wash quality seriously, so we load our machines with corrosion-proof stainless steel components.

STAINLESS STEEL FITTINGS

In addition to stainless steel rails and components, all of our plumbing components and fittings are stainless steel too!

TWO (2) YEAR LIMITED WARRANTY

YES, it's true! Two YEARS! We stand by our products because we work with brilliant engineers who design our car washes to last for millions of cars.

OSCILLATING NOZZLES

Our nozzles provide 200% to 400% more cleaning power! They are twice the size, deliver twice the spray, and work reliably with reclaim water. Our spray pattern is narrow for tightly focused, reliable point-of-cleaning contact so it speeds up the wash process. Each nozzle oscillates back and forth at high speeds and every inch of your car is cleaned at least twice.

DUAL 25-HP PUMPS

Dual pumps complete high pressure passes in half the time and with double the cleaning power.

HEATED MOTORS

Heated motors and electrical enclosures reduce condensation and extend component life. We design our washes to work reliably in your climate.

SEALED HYPOID GEARBOXES

Sealed hypoid gearboxes are quiet, powerful, and highly efficient. They're virtually maintenance-free, which helps reduce operating costs.

WASH TALLER VEHICLES

Our washes are 6-12" higher than the standard height of most in-bay and tunnel car wash systems. Our standard 8 ft. vehicle clearance increases your customer base and your wash volume.

LEDs THAT SPARKLE

Make your wash bay glow and shine! Petit lights are more intense because our nozzles produce larger water droplets, reflecting four times the light. With so much water spraying around and the colors changing according to wash pass, you'll be sure to wow your customers!

DUAL SPRAY ARMS

Increase your volume with our dual spray arms. Dual arms wash, wax, and rinse vehicles 2x faster so you can get tunnel results with in-bay costs.

VERTICAL PROFILING

Patented Vertical Profiling System increases spray impact and reduces water usage. How? Our upper-level side nozzles activate based on vehicle height, so you only use the chemical and water you need.

WASH MORE VEHICLES

The Accutrak 360-i is built to handle vehicles with ladders, luggage racks, ski racks, and other vehicle accessories. Our ability to wash unique vehicles means more throughput, and more sales.

VERTICAL PROFILING PRESSURE

Our car wash automatically adjusts pressure based on the vehicle's size, height, and shape. You get the same powerful clean on the hood of a sedan and on the top of an 8-foot tall vehicle. Get a customized, consistent clean with our Vertical Profiling Pressure System.

EASY MAINTENANCE FEATURES

Replaceable polymer inserts in idler wheels and pivot points extend the lifespan of your wash equipment. Plus there are no rotary swivels, no pneumatic tires, no belts, and no pulleys in the bay to slow down your wash.

REMOTE MONITORING

Get full control of your car wash from anywhere in the world with our cloud-based remote monitoring control system. Access your wash easily using your phone, tablet, or PC.

TRAFFIC GATE CONTROL

Build your car wash volumes with our built-in traffic gate control. Stack up to 10 vehicles after the auto-cashier.

CONFIGURABLE WASH PACKAGES

8 configurable wash packages help you customize your clean. Includes triple foam, 2 low-pressure chemicals, 2 high-pressure chemicals, under-body, and medium pressure passes.

Standard features

INCREASED HEIGHT

With a standard height of 8ft. (an industry first), the Accutrac 360-i increases the types of vehicles your car wash can clean. More vehicles, more volume, more washes, more profit.

What Makes the
Accutrac Such a
Great Wash?

**SUPERIOR.
CLEANING.**

DOUBLE THE SPEED

Dual Spray Arms wash, wax and rinse vehicles faster, giving the 360-i the ability to effectively clean up to 29 cars per hour!

DOUBLE YOUR SPRAY IMPACT

Pump the same amount of water (at the same pressure) through half as many nozzles (that are twice as large) and you get twice the spray impact!

Standard. ACCUTRAC 360-i

EXCEPTIONAL ENGINEERING

ACCUTRAC 360-i
DOUBLE SPRAY COVERAGE
WITH LED ENHANCEMENTS.

i-11

PATENTED CLEANING FEATURES

Our Vertical Profiling System measures the height of the vehicle and adjusts the spray impact accordingly. This system maintains superior spray impact regardless of vehicle height. It reduces water wastes and increases cleaning impact. Unique to Petit.

HALF THE MAINTENANCE

Reduced your yearly car wash maintenance costs because the 360-i has...

- NO rotary swivels
- NO pneumatic tires
- NO belts or pulleys

DOUBLE THE CLEANING

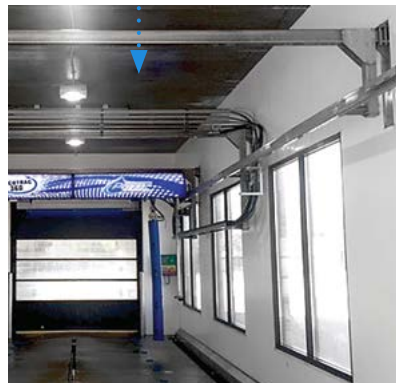

Oscillating spray nozzles clean every spot on the vehicle 2x. This double coverage enhances high pressure cleaning (think bug removal) and spot free rinsing. Reclaim water is not an issue with our nozzles, so you can wash harder, faster and more reliably.

Optional features

STAINLESS-STEEL WALL MOUNTS

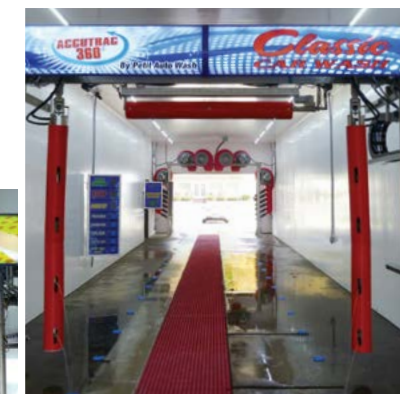

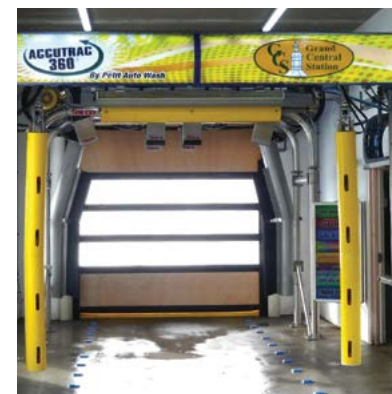

Open up your wash bay with our durable stainless-steel wall-mount system.

Options.

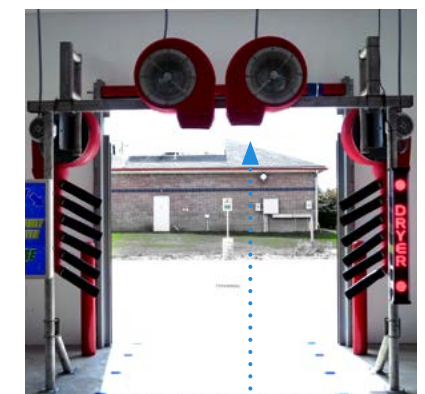

ACCUTRAC 360-i

MAKE A GREAT WASH BETTER

CUSTOM COLORS & GRAPHICS

With a standard height of 8ft. (An Industry First), the Accutrac 360-i increases the number of customers your car wash can wash. More washes, more profit.

TUNNEL RESULTS IN-BAY SAVINGS

Our IBAs are able to get impressive tunnel volumes with 2+ Accutrac 360-i's.

INSTRUCTIONAL SIGNS

Get eye-catching car wash signs designed to fit your brand. Car wash entrance signs and informational signs give customers the info they need to keep the wash running smoothly. Customized graphics lets users know what options you offer and provide tips on how to best use the equipment.

TRAFFIC GATE

Use Accutrac's built-in queue control system and add a traffic gate to further expedite customer payment and streamline the entire payment to wash process. This works great with wash club programs that utilize RFID, camera or mobile phone apps to activate the wash system.

FOAM WATERFALL

Providing customers with a light show is a big car wash demand. Kick your car wash up a notch with a luxurious waterfall of foam. Combine your foam waterfall with LED illumination for a cascading display that looks great and cleans great.

RAIN ARCH

The newest feature from Petit! Like all of our innovations, our Rain Arch has been thoroughly tested and meticulously engineered before hitting the market. Combine with LEDs to create an illuminated experience that will make your customers enjoy the car wash while getting a faster and superior clean.

FREE STANDING DRYER

Not only do customers expect a clean car, they want a dry car. Satisfy your customer's expectations with a stand-alone dryer. When optimum output is mandatory, a great dryer will give consistent drying results and greater customer satisfaction. Your free-standing dryer will help increase wash volumes and keep the line moving by completing the drying process while your next customer enters the wash.

ACCUTRAC 360-i

GET THAT NEW CAR WASH SMELL

SYSTEM BENEFITS:

- ★ Wash up to 29 cars per hour.
- ★ Standard 8-foot-high vehicle clearance increases available customer base
- ★ Increased cleaning power with high-impact oscillating nozzles and vertical vehicle profiling
- ★ Reduced electricity consumption using VFD motor control
- ★ Reduced water consumption from selective nozzles activation based on vehicle height
- ★ Reduced maintenance: no rotary swivels, pneumatic tires, belts, or pulleys

CAR WASH FEATURES:

- ★ Dual Spray Arms and Dual 25-HP Pumps
- ★ Patented Vertical Vehicle Profiling increases spray impact & reduces water usage
- ★ Stainless Steel, corrosion-proof components used in the wash-bay
- ★ Heated motors & electrical enclosures reduce condensation and extend component life
- ★ Super-Clean Mode with quadruple spray coverage - washing the vehicle 4x in a single pass
- ★ Maintenance free sealed hypoid gearboxes
- ★ Replaceable polymer inserts to extend lifespan of idler wheels and pivoting components
- ★ Real-time remote monitoring & car wash control on your phone, tablet, or PC
- ★ LED light show changes color according to wash pass
- ★ Eight configurable wash packages

TECHNICAL INFORMATION:

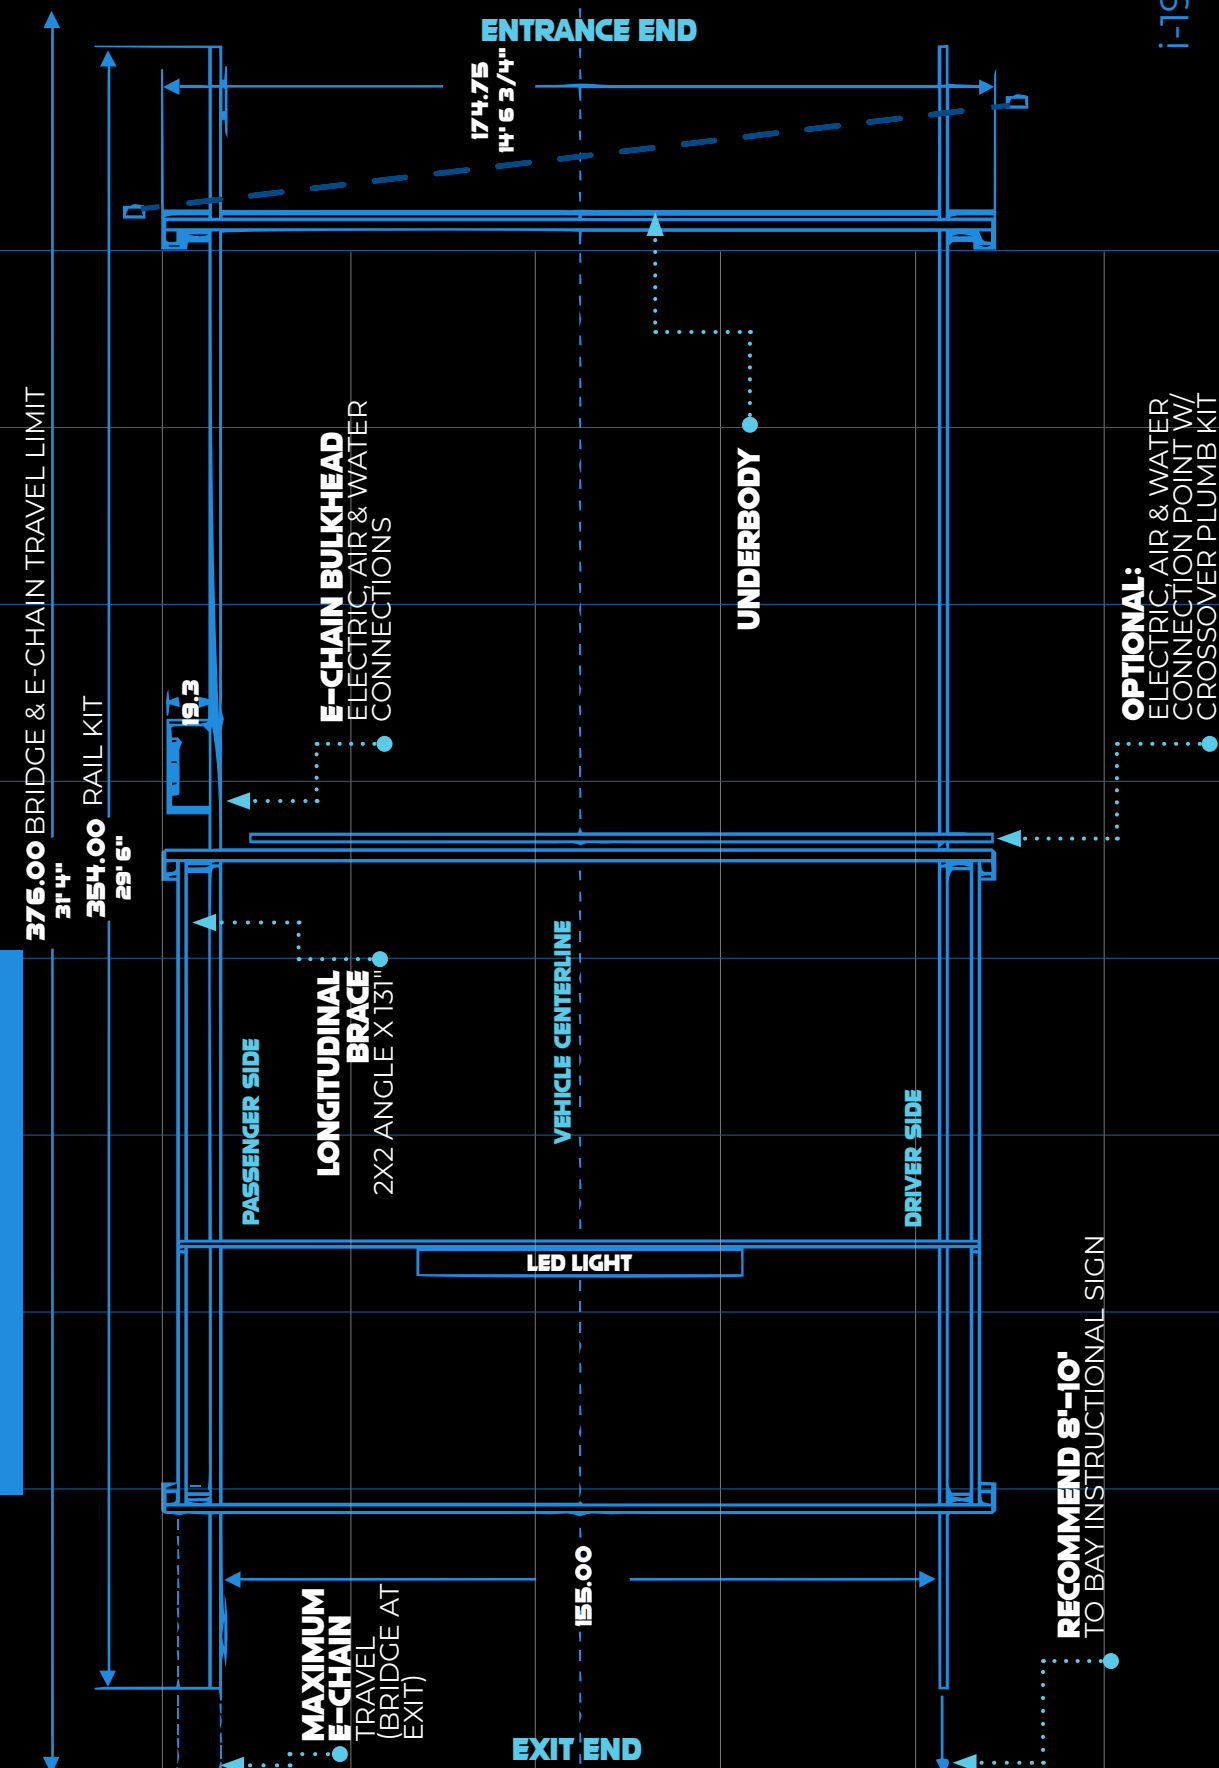

- ★ Standard Minimum Wash Bay Size: 31'4" long x 14'7" wide x 10'11" high.
- ★ Narrower options available on special request. Minimum measurement 13'10"
- ★ Control Power: 19 Amps @ 208 / 230V 3-phase
- ★ 25-HP Pump Power: 65 / 60 / 30 Amps @ 208 / 230 / 460 Volt 3-phase
(two pumps required for dual-pump version)

OPTIONAL FEATURES:

- ★ Chemical monitoring system
- ★ Foam waterfall
- ★ Rain arch
- ★ Single or double high-pressure pump station
- ★ Free standing dryers
- ★ Custom signage
- ★ Traffic gate
- ★ Custom machine colors to match your brand
- ★ Custom designed machine graphics to perfectly match your brand.

ACCUTRAC 360-i OVERHEAD VIEW

★★★★★

MURRYSVILLE CAR WASH : MURRYSVILLE, PA

"Over the course of 5 years my Laserwash was down for a combined two months' worth of time and the repair costs well exceeded \$10,000. When I replaced my Laser with the Accutrac 360-i, I saw my wash volume increase by 20% and I've been down a total of one day over 4 years in service. Plus, the total repair costs for the Accutrac 360 have been less than \$1,000 over those four years!"

★ **50 YEARS**
IN THE
CAR WASH
INDUSTRY

We're the
company that
sped up the
in-bay automatic
and invented
The Robot.

About Us.

ACCUTRAC 360-i

FIFTY YEARS & COUNTING

1968 was a landmark year in innovation. Boeing unveiled the model 747, human beings orbited the moon for the first time, and Tom Petit, Sr. and his wife Rita Petit opened their first car wash in Norton, Ohio. This was the beginning of what would become known as Petit's Auto Wash.

Car washing quickly became a family business. Tom Petit Jr., was just eight years old when he began working at the family's car wash. The years went by and as Tom and Rita opened up more car washes, their sons became more involved and very soon their family was fully dedicated to the car wash industry.

Eventually, Tom Jr. grew up and left the cozy car wash nest. He spent the next few years earning a Bachelor's Degree in aerospace technology, obtaining his Airline Transport Pilot rating, and working as a corporate pilot. As a pilot, he had time to spare between flights. Tom used this time to travel to different car washes and research car wash equipment. He liked the mental challenge. He liked to figure out how everything worked and how to make the best machines better. His boredom gave birth to some really great ideas and he combined these ideas with his aerospace engineering education to invent and innovate Tom Sr.'s car washes. Ideas turned into prototypes, prototypes into patents, and in 1989, the first of Tom Jr.'s eight

U.S. Patents were approved. He incorporated Petit Auto Wash and Tom Jr. began manufacturing car wash equipment.

It's been fifty years since the Petit family entered the car wash business. They are known for quality, durability, and hyper-advanced car wash equipment, but most of all they're known for excellence in technology. Petit's car wash customers are their biggest fans and Petit appreciates how they've helped them expand over the years. Their manufacturing facility has grown to include a multimillion-dollar inventory and Tom Jr.'s role in the car washing industry has grown as well. In addition to his current job as President of Petit Auto Wash, Inc. Tom Jr. has served as President of the Ohio Car Wash Association and on the International Car Wash Association's Market Research Committee.

Currently, Tom Jr. and his brother Dennis own and manage more than a dozen car washes in Northeast Ohio. Although the company has grown significantly over the last several decades, Petit continue to operate as a family business. They are very proud of their position in the car wash industry and of their equipment, their company, their employees, and their history. Petit would love to see you become part of it. Are you ready to become part of the Petit Auto Wash family? ★
