PETIT

THE TUNNEL XR-SERIES CAR WASH EQUIPMENT

WHERE POWER MEETS
PERFORMANCE

Technical information

Cleaner. Faster.

XR-SERIES

HIGH-IMPACT CLEANING

SYSTEM BENEFITS:

- ✦ Get a customized setup to increase your cleaning and rinsing power.
- ✦ Petit's oscillating spray nozzles provide double coverage on all vehicle surfaces.
- ✦ Removes abrasive grit from vehicles to help protect the rest of your car wash equipment.

SYSTEM FEATURES:

- ✦ Standard 8-foot-high vehicle clearance increases available customer base.
- ✦ Extra small footprint stationary wash system to optimize tunnel performance.
- ✦ Reduced maintenance features: no rotary swivels, pneumatic tires, belts or pulleys.
- ✦ Capable of chemical application, high-pressure wash, or spot-free rinsing.
- ✦ Increased cleaning power due to use of high-impact oscillating nozzles
- ✦ Stationary arch mounting
- ✦ XR Pre-Soak Applicator Arch
- ✦ XR Spot-Free Rinse Arch
- ✦ XR High Pressure Side & Top Washers

SYSTEM OPTIONS:

- ✦ 3-position pivoting functions
- ✦ Foam applicators
- ✦ Petit's 25-HP Pump Stations

TECHNICAL INFORMATION:

- ✦ Maximum Conveyor Speed: Speed is manually set on the potentiometer (Max 240CPH) See speed chart
- ✦ Dimensions: Free Standing Rail Kit: 12'7" wide x 3' long x 10' high

Petit's XR Series tunnel car wash system is a customized combination of spray arms mounted on stationary arches for chemical applications, high-pressure washing, or spot-free rinsing in a smaller tunnel footprint. The XR's arches require only 2 to 3 feet of tunnel space and can be configured to suit your specific application.

Like the Accutrac 360-t and 360-i, our spray arms feature high-impact nozzles that oscillate back and forth at high speeds and have the ability to treat every spot on the vehicle twice. Our double spray coverage applies chemicals evenly, washes with high-impact, and significantly improves your car wash rinse results with double the spray and double the power.

The XR comes equipped with the patented oscillating nozzles Petit is known for coupled with pivoting options to enhance cleaning power, helping to obliterate bugs, salt, and grime on mirrors and the fronts and backs of all vehicles. The 3-position pivoting function lets car wash operators choose the best angle for their tunnel. Each arm can be set to up to 45 degrees towards the front or rear of a vehicle. The pivot function also helps to proficiently rinse out hard-to-reach vehicle areas - like mirrors and rear visors.

The XR Series car wash spray arms have no rotary swivels, making them ideal for reclaimed water systems. The high-pressure side washers add high-impact cleaning power to the side of vehicles, particularly targeting rocker panels, tires, and rims. Ready to learn more about the XR Series? Give us a call. We want to make your car wash work for you!
